

爱大 VPN 使用教程

1. 打开爱大 IT Help 网站 ([VPN \(Virtual Private Network\) | The University of Edinburgh](#))

The screenshot shows the 'VPN (Virtual Private Network)' page on the University of Edinburgh's IT Help website. At the top, a breadcrumb trail reads: Home > Information Services > Computing > Desktop and personal computing > Secure access to systems from off campus. A 'Contact us' button is in the top right. The main heading is 'VPN (Virtual Private Network)'. Below it, a paragraph states: 'Even if you are based in Edinburgh it may still be worthwhile to register for the University's Virtual Private Network (VPN)'. The page features six teal-colored boxes with white text, arranged in two columns. The left column contains: 'Introduction' (describing VPN as a method of securing communications), 'Using the VPN service' (providing setup and connection information), and 'L2TP/IPSec VPN clients' (listing different clients). The right column contains: 'Registering' (linking to the registration service), 'Help and support' (offering help for difficulties), and 'FortiClient VPN' (describing the FortiClient client for secure connections). At the bottom, a 'Related links' section includes a link to 'Connect to a secured network drive on Windows or Mac'.

2. 点击 Registration 以后， 点击 register or reset your passwd for the VPN services

The screenshot shows the 'Registering' page for the University of Edinburgh's VPN service. The heading is 'Registering'. Below it, a paragraph states: 'Registering for the University's Virtual Private Network (VPN) service.' A paragraph follows: 'Please see the guidance at the following EASE-restricted link and then choose to set a password for your VPN access. You can also reset your VPN password using this link.' Below this is a blue link: 'Register or reset your password for the VPN service'. Another paragraph states: 'If you have problems logging in to the VPN then your account may be suspended or you may not be entitled to use the service. You can check the status of your account here:' followed by a blue link: 'Wireless, VPN and LapLAN Account Status Details'. At the bottom, a bold note states: 'NOTE: Alumni are not entitled to use this service.'

Registering

Registering for the University's Virtual Private Network (VPN) service.

Please see the guidance at the following EASE-restricted link and then choose to set a password for your VPN access. You can also reset your VPN password using this link.

If you have problems logging in to the VPN then your account may be suspended or you may not be entitled to use the service. You can check the status of your account here:

[Wireless, VPN and LapLAN Account Status Details](#)

NOTE: Alumni are not entitled to use this service.

3. 登录爱大账号（上次注册爱大时用的）

4. 设置 VPN 密码（务必保存好）

THE UNIVERSITY of EDINBURGH

The University's VPN Service

Contact

Register and manage VPN password for username s2620410

To set password for the VPN service

This password **MUST NOT** be your university login password

Enter password:
Confirm password:

Guidance

Your VPN password should be **at least 12 characters** long and must include characters from **at least 3 classes** which are:

- lowercase letters
- uppercase letters
- digits
- printable characters
- others

If you have previously registered for wireless and LapLAN and are not using your Office 365 login for wireless and LapLAN, then you should use your VPN password for wireless and LapLAN.

If you have never registered for wireless and LapLAN or have registered to use your Office 365 login password, then you should continue to use your Office 365 login password for wireless and LapLAN.

The confirmation page will indicate your VPN / Wireless / LapLAN service status

If you need advice on setting a good password, [please click here](#).

Do NOT use the UK pound sign (£) in your VPN password as it may be treated ambiguously.

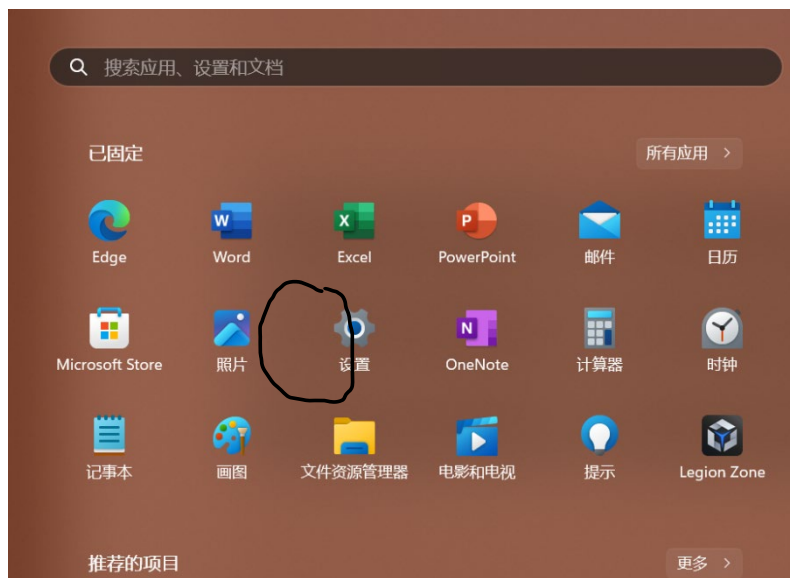

You can also use this page to reset your password to either a new password or to confirm your existing password.

5. 设置完密码就代表 VPN 账号已经激活

6. 下面阐述不同平台如何连接 VPN

7. Windows 平台

8. 打开设置

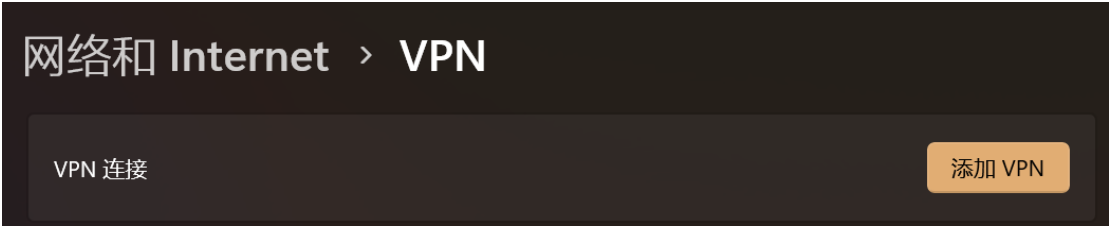

9. 网络和 Internet

10. 选择 VPN

11. 选择添加 VPN

12. 按照如下格式填写（预共享密钥为 Zt6337ZnVLhN）（用户名密码留空即可）

添加 VPN 连接

VPN 提供商

Windows (内置) ▾

连接名称

VPN@Ed(名字随意)

服务器名称或地址

remote.net.ed.ac.uk

VPN 类型

使用预共享密钥的 L2TP/IPsec ▾

预共享密钥
